

Childcare Facilities for Students

GD Goenka University offers excellent childcare facilities for its students and staff. The university has a daycare center on campus that provides care and early education for children aged 1 to 6 years old. The center is staffed by qualified and experienced childcare providers who engage the children in educational activities and games in a safe, nurturing environment. There are also nursery and preschool classes focused on developing children's cognitive, motor, and social skills. The childcare facilities aim to support students and staff who are balancing pursuing their education or careers along with parenthood.
