11 SUSTAINABLE CITIES AND COMMUNITIES

Indicator 11.4.6 SDG 11: Sustainable Cities and Communities

Pedestrian Priority on Campus

THE question: Does the University as a body prioritise pedestrian access on campus?

> Yes. The campus is laid out for walking. Footpaths connect every block, and vehicles are kept away from the teaching and hostel buildings.

Tree-lined pedestrian walkway

Pedestrian paths between blocks

Paver-tile walkway

Parking kept on separate paver areas

How the campus puts pedestrians first

- Internal footpaths and tree-lined walkways link academic blocks, schools, the library, laboratories, administrative offices, sports grounds and hostels.
- Walkways are laid with durable concrete paver tiles for a stable, even surface; parking is kept on separate paver-block areas away from the walking routes.
- Cycle stands and electric golf carts give low-emission options for longer distances inside the campus.
- Vehicle movement is restricted around teaching and residential blocks (Environment and Sustainability Policy).
- Ramps, handrails, lifts and wheelchair-accessible pathways let everyone move between departments.
- Electric carts are available for people who need help or in an emergency.
- Traffic is managed inside the campus by security staff, with surveillance cameras.
